

LAKE AREA PEDIATRIC PEDIATRIC NURSE PRACTITIONER PHYSICIAN ASSISTANT

Pediatric Nurse Practitioners and Physician Assistants are health care providers who are dedicated to improving health. Both have advanced education and training in pediatric and or family health care. They service children and families in an extensive range of practice settings. Working with pediatricians and other health care providers, PNPs and PAs have been enhancing the health care of children for over forty years.

PNPs and PAs serve as pediatric health care providers for well and ill children of all ages. Many parents choose a PNP or PA as their child's health care provider knowing they will receive individualized quality health care. PNPs and PAs offer a variety of services including:

- Provide health maintenance care for children, including well child exams

- Perform routine developmental screenings

- Diagnose and treat common childhood illnesses

- Provide anticipatory guidance regarding common child health concerns

- Provide childhood immunizations

- Perform school physicals

When scheduling an appointment, you as the parent or care giver, can notify the scheduler who you prefer to see. If the physician is unavailable or has a full schedule, we will offer an appointment with our PA or PNP. Please be advised that the Physician will be in the office or available by phone at all times that the PA or PNP is seeing patients.
